

Day 1

Time	Type	Authors	Title
9:00-10:00	Invited	Andrew Swan	TBA
10:00-10:30	Break	-	
10:30-10:55	Contributed	Christian Sattler and David Wärn	Axioms for higher category theory
10:55-11:20	Contributed	Calvin Santiago Lee	Univalent Multicategories
11:20-11:45	Contributed	Tom de Jong, Nicolai Kraus and Axel Ljungström	The Leibniz adjunction in homotopy type theory, with an application to simplicial type theory
11:45-12:10	Contributed	Wojciech Paupa	Symmetric products in HoTT
12:10-13:30	Break (Lunch)	-	
13:30-14:30	Invited	Stefania Damato	TBA
14:30-14:55	Contributed	Hua, Awodey, Xu, Carneiro, Hazratpour, Nawrocki, Woolfson	HoTTLean: Formalizing the groupoid model of MLTT
14:55-15:25	Break		
15:25-15:50	Contributed	Ulrik Buchholtz, Daniel Gratzer and Jonathan Weinberger	The infinity category of infinity categories in simplicial type theory
15:50-16:15	Contributed	Rahul Chhabra, Carlo Angiuli and Daniel Gratzer	The structure homomorphism principle in simplicial type theory
16:15-16:40	Contributed	Samuel Toth	Towards an Agda formalisation of directed univalence in triangulated type theory
16:40-17:05	Contributed	Islam Talipov and Nikolai Kudasov	Towards Formalization of Directed Univalence in Rzk proof assistant

Day 2

Time	Type	Authors	Title
9:30-10:30	Invited	Hugo Moeneclaey	Sheaves in HoTT with applications to synthetic algebraic geometry
10:30-11:00	Break	-	
11:00-11:25	Contributed	Hugo Moeneclaey and Felix Cherubini	In Memory of Tim Lichtenau: Deligne-Mumford Stacks in Synthetic Algebraic Geometry
11:25-11:50	Contributed	de Jong, Kraus, Mohammadzadeh and Nordvall Forsberg	Generalized Decidability via Brouwer Trees
11:50-12:15	Contributed	Rafaël Bocquet	A general cubical framework for coherence theorems
12:15-13:35	Break (Lunch)		
13:35-14:00	Contributed	Raphaël Sterbac and Jonathan Sterling	Cumulative universes hierarchies in theory and practice
14:00-14:25	Contributed	Pavel Turyansky and Alexander Gryzlov	Into the Wild: Heterogeneous Quivers and Level-Polymorphic (Co)limits in Cubical Agda
14:25-14:50	Contributed	Noah Ortiz and Yiming Xu	A Path-Type Weak Factorization System
14:50-15:15	Contributed	Yufeng Li and Krzysztof Kapulkin	Pushforwards in Inverse Homotopical Diagrams
15:15-15:45	Break		
15:45-16:10	Contributed	Maximilian Petrowitsch	Elementary ∞ -toposes from type theory
16:10-16:35	Contributed	Antoine van Muylder, Andreas Nuyts and Dominique Devriese	Nominal Type Theory by Nullary Internal Parametricity
16:35-17:00	Contributed	Manuel Catz, Hugo Herbelin and François Métayer	Oriented Simplices and Cubes are Parametric
